Xpressions System

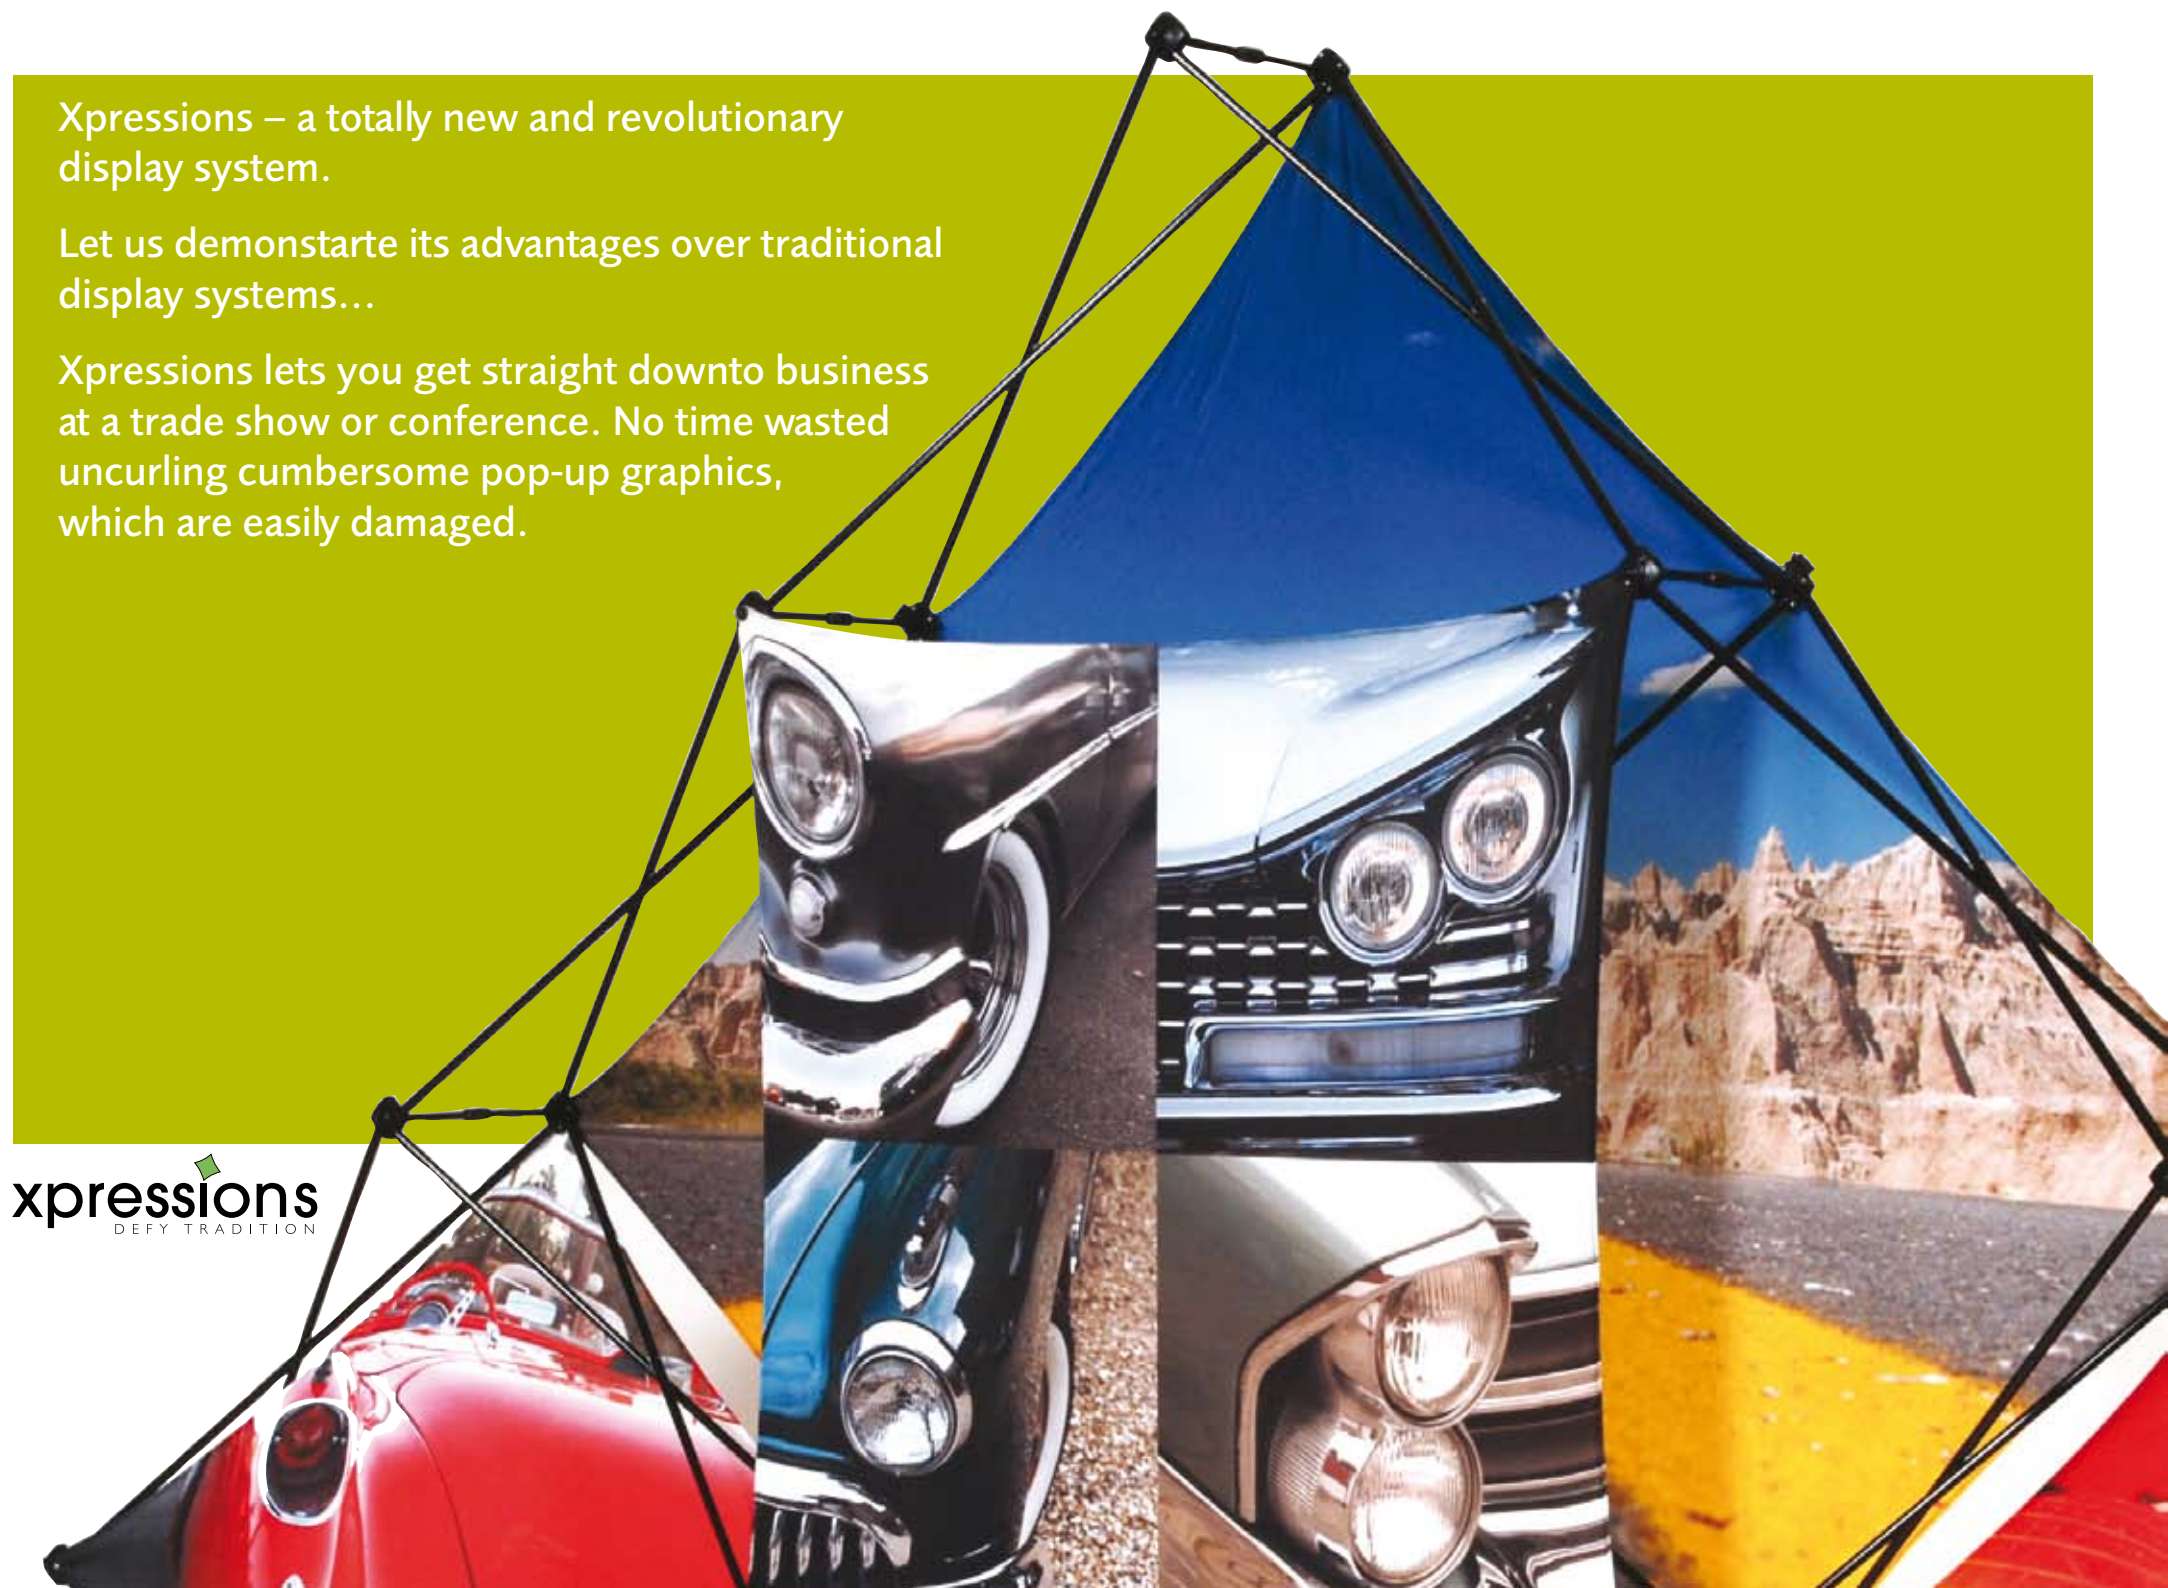

Xpressions – a totally new and revolutionary display system.

Let us demonstrate its advantages over traditional display systems...

Xpressions lets you get straight down to business at a trade show or conference. No time wasted uncurling cumbersome pop-up graphics, which are easily damaged.

xpressions
DEFY TRADITION

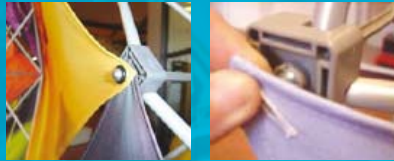

Three dimensionality of the fabric graphics and their stretchiness create visual impact and drama.

Leave the graphics on and be the first ready at the show! Also, be the first home...

"The fabric panels just hook on. Simple!"

Strong magnets work in conjunction with lightweight aluminium frames to create a sturdy frame structure.

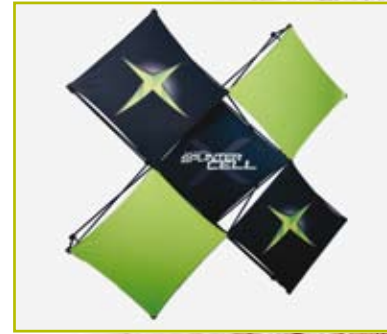

Pyramid

Versatile

All systems come with a padded carry case, a full set of fabric graphics and instructions. A lifetime warranty is standard on all our systems.

Let us discuss your requirements to find the best solution for your needs.

3 x 1

3 x 2

3 x 3

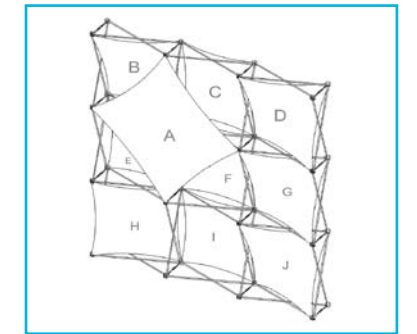

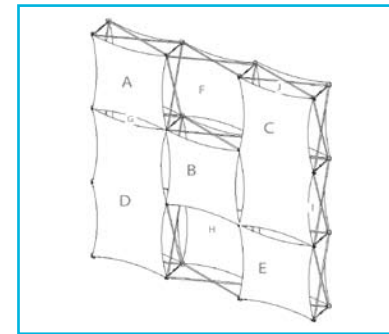

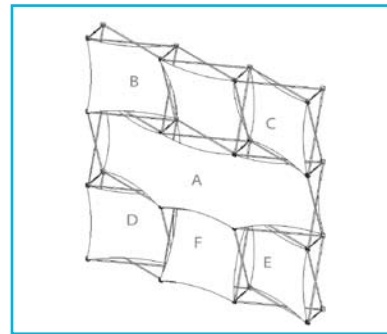

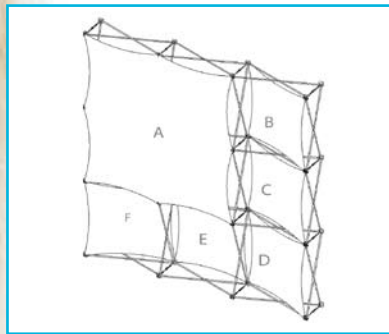

The Xpressions range is an obvious trade stand and exhibition solution. However, more and more customers are recognising its value as a retail display solution. Our costs over volume are very attractive.

There are a wealth of different exciting layouts for each configuration – for example:

The system can be employed as a projector screen or conference set back drop, as shown here, used to great effect by GAP.

With argyle shapes, cross shapes and L shapes there are many ways to create impact.

The option to position the towers on their sides or suspend from the ceiling using wires make a dramatic impression.

The shelf options include a flat steel shelf which is available in black or white on lower volumes and in any colour over higher volumes. Shelf edge strips and barkers can be added to make an ideal retail solution.
